

Bankhead MARTA Transit Area LCI Plan  
Proposed Updates to Draft Plan Recommendations  
Updated 2/15/06

1. Add task to recommend that the State remove the designation as state waters from designated areas east of the rail line and Maddox Park, since these areas have been cut off by the rail line and are no longer part of the Proctor Creek stream system
2. Update 15-year future land use designations for several parcels in the area bounded by North, Cairo, Neal, and the extension of Temple streets, in order to increase the ability of land to be consolidated and redeveloped, and to buffer the existing single family areas from this intensification.
3. Add tasks to improve and extend Pelham and Neal streets to the west to provide additional access to Maddox Park from the community.
